

Watertec UV System

Watertec UV System

With over 10 years of experience in the design of disinfection and oxidation systems, Watertec is recognised internationally as a leader in Ozone and Ultraviolet (UV) disinfection systems.

Unique quartz tube cleaning mechanism

Key Features

- Provides effective barrier against parasites such as *Cryptosporidium* and *Giardia*.
- Medium Pressure Technology.
- Cost-Effective Power Controls.
- Low Maintenance.
- Zero Residual Disinfection Capability.
- UV Intensity Monitoring.

Major Applications

- Biological Control
- Potable Water Disinfection
- Municipal Waste Treatment
- TOC Control
- Ozone Destruction
- Advanced Oxidation

Watertec UV Systems are the answer for demanding water disinfection applications that require consistent water quality and reliable performance.

- Total Organic Carbon (TOC) Control
- Potable Water Disinfection
- Waste & Recycle Water
- Biological Control
- Recreational Swimming
- Pool Treatment
- Experienced field service support for installation, start-up and training.
- Unique vortex contact design
- Unique quartz tube cleaning mechanism.
