

OZGEN WATER TREATMENT SYSTEM

Com-Bi Ozonator/Dryer – Portable Unit c/w Anthracite Filter

Ozone, the tri-atomic oxygen is the strongest commercially available oxidizing agent and the most reactive disinfectant. Ozone is aggressive in reactivity and highly diffusive, it leaves no harmful residual in water.

Com-Bi ozonator has combined both Ozone Generator and Air Dryer in a single unit to produce ozone from atmospheric air through Corona Discharge, which is the most effective and economic method.

- ✓ **Sparkling Clear Water**
- ✓ **Safe Drinking Water**
- ✓ **Odor & Taste Removal**
- ✓ **Colour Removal**
- ✓ **Bacteria & Virus Removal**
- ✓ **Iron & Manganese Removal**
- ✓ **Insecticide & Pesticide Removal**
- ✓ **Low Operating Cost**
- ✓ **Easy Installation**
- ✓ **Low Maintenance**

Models Available

Water capacity calculated based on 2mg/l

<i>Model</i>	<i>*Capacity (m3/h)</i>	<i>Power (kwh/m³)</i>
Com-Bi 2	10	0.069
Com-Bi 4	20	0.109
Com-Bi 6	30	0.176
Com-Bi 10	50	0.260
Com-Bi 20	100	
Com-Bi 30	150	
Com-Bi 40	200
