

AR Series

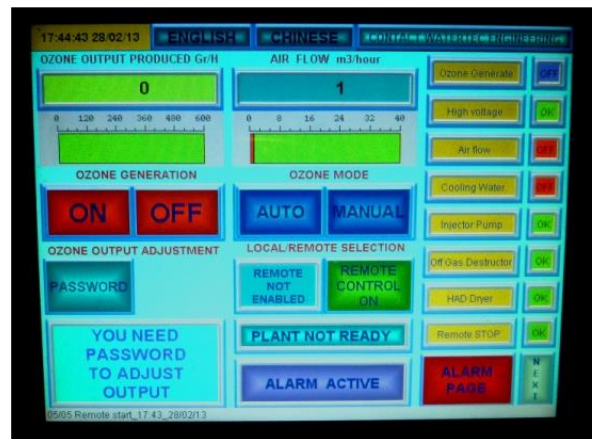

Ozone is quickly becoming one of the world's preferred methods of chemical oxidation. Here at Watertec Engineering PTY. LTD. Have developed the OZGEN range of ozonators. These incorporate the most up to date designs for efficient ozone generation, construction materials and electronic controls.

Through innovation in design the generation cells have been field tested over a number of years, and combine high generation efficiency with ease of maintenance. Modular generation cells, each having a capacity of 100g/h O₃ allow maximum flexibility to satisfy varying treatment requirements. The cells are water cooled and use high quality, dielectric tubes

The AR series features

- Corona Discharge Ozone Production
- Energy Efficient
- Modern Power Electronics
- Fail Safe Protection Systems
- Pressure or Vacuum air feed
- Suit all voltage/frequencies mains power supplies
- 0 to 100% output regulation
- Water cooled generation cells
- Modular design
- Air or oxygen feed
- Low maintenance requirements
- P.L.C. controlled
